

OBAOLUWAFELA ADEKOYA

Junior Full-Stack Developer | React.js | Next.js | Node.js

Nigeria | GitHub | Portfolio | LinkedIn

PROFESSIONAL SUMMARY

Junior Full-Stack Developer with hands-on experience building responsive, production-oriented web applications using **React.js, Next.js, JavaScript, TypeScript, Node.js, Express.js, and MongoDB**. Experienced in developing modern user interfaces, integrating APIs and third-party services, managing application state, implementing authentication and payments, and deploying applications with **GitHub and Vercel**. Strong problem-solving skills with practical experience debugging build, deployment, environment-variable, API, and frontend issues.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap, MUI, Responsive Design, React Icons, Gsap, Swiper.js

State & Data: Redux, Redux Toolkit, React Hooks, REST APIs, JSON, zustand

Backend: Node.js, Express.js, MongoDB

Integrations: Stripe, EmailJS, Cloudinary, Google Maps API,

Tools & Deployment: Git, GitHub, Vercel, Yarn, Vite, ESLint, Netlify

SELECTED PROJECTS

Full-Stack E-Commerce Application — Next.js

- Built a modern e-commerce application using **Next.js, React, TypeScript, and Tailwind CSS**.
- Implemented product browsing, cart and checkout functionality with **Stripe payment integration**.
- Integrated **Cloudinary** for remote image management and optimized image handling with Next.js.
- Configured environment variables for secure API and payment credentials.
- Used Git/GitHub for version control and deployed the application through **Vercel**.
- Diagnosed and resolved production build and deployment issues involving environment variables, dependencies, and Next.js configuration.
- Built a modern Landing Page with live animations and interactive sessions

Weather Application — React.js

- Developed a responsive weather application using **React.js, Vite, and API-driven data**.
- Implemented city search and selectable default cities with detailed weather information.
- Used **Redux/Redux Toolkit concepts** for predictable application state management.
- Designed responsive weather cards and interactive user interfaces for desktop and mobile devices.

Developer Portfolio — React.js

- Built and deployed a responsive personal portfolio using **React.js and Vite**.
- Created reusable components including navigation, profile, about, projects, resume, contact form, and footer sections.
- Implemented responsive navigation, smooth scrolling, animations, project sliders, and mobile-friendly layouts.
- Integrated **EmailJS** for contact form communication and validated environment-based configuration.
- Used Git/GitHub for source control and deployment workflows.

DEVELOPMENT EXPERIENCE

Frontend & Full-Stack Development — Independent Projects

2025 – Present

- Build full-stack web applications from UI design through backend integration and deployment.
- Work with component-based architecture and reusable React components.
- Integrate third-party APIs and services into production-oriented applications.
- Troubleshoot JavaScript, TypeScript, React, Next.js, CSS, dependency, and deployment errors.
- Practice modern development workflows using Git, GitHub, Yarn, and Vercel.

EDUCATION

[SSCE]

Omole Senior Grammar School
